TRYPTIC SOY BROTH, MODIFIED with 20 mg/L NOVOBIOCIN & ACID DIGEST OF CASEIN (7731)

Intended Use
Tryptic Soy Broth, Modified with 20 mg / L Novobiocin & Acid Digest of Casein is used for the selective enrichment of enterohemorrhagic E. coli in foods. Conforms to USDA Formulation\(^1\) with Novobiocin supplementation in a laboratory setting. Tryptic Soy Broth, Modified with 20 mg / L Novobiocin & Acid Digest of Casein is not intended for use in the diagnosis of disease or other conditions in humans.

Product Summary and Explanation
The first major outbreak of E. coli O157:H7 was in 1982, and traced to contaminated hamburgers.\(^2\) Other known sources of infection include sprouts, lettuce, salami, unpasteurized milk, juice and/or swimming in or drinking contaminated water.\(^3\) Tryptic Soy Broth, Modified with 20 mg / L Novobiocin & Acid Digest of Casein is used to enrich food samples suspected of having low levels of EHEC during pathogen testing.\(^1,4,5\)

Principles of the Procedure
Enzymatic Digest of Casein, Acid Digest of Casein, and Enzymatic Digest of Soybean Meal provide nitrogen, vitamins and minerals to stimulate growth in Tryptic Soy Broth Modified with 20 mg / L Novobiocin & Acid Digest of Casein. Sodium Chloride maintains the osmotic balance of the medium. Dipotassium Phosphate is the buffering agent. Dextrose is the carbon energy source. Bile Salts No. 3 and Novobiocin are used as selective agents to inhibit bacterial growth.

Final pH: 7.3 ± 0.2 at 25\(^\circ\)C

Formula may be adjusted and/or supplemented as required to meet performance specifications.

Precaution
1. For Laboratory Use Only.
2. IRRITANT. Irritating to eyes, skin, and respiratory system.

Directions
1. Suspend 43.02 g of the medium in 1000 mL of purified water.
2. Autoclave at 121\(^\circ\)C for 15 minutes.

Quality Control Specifications
Dehydrated Appearance: Powder is homogeneous, free flowing, and light to medium beige.

Prepared Appearance: Prepared medium is brilliant to clear, none to light precipitate, and light to medium amber.

Expected Cultural Response: Tryptic Soy Broth Modified with 20 mg / L Novobiocin & Acid Digest of Casein was inoculated with the test organisms listed below. These organisms were incubated at the appropriate atmosphere and temperature and examined for growth after 18 – 22 hours.
Microorganism | Approx. Inoculum (CFU) | Growth |
--- | --- | --- |
Escherichia coli ATCC® 25922 | 10 - 300 | Growth |
Escherichia coli ATCC® 11775 | 10 - 300 | Growth |
Escherichia coli O157:H7 ATCC® 35150 | 10 - 300 | Growth |
Escherichia coli O157:H7 ATCC® 43888 | 10 - 300 | Growth |
Escherichia coli O157:H7 ATCC® 43889 | 10 - 300 | Growth |
Escherichia coli O157:H7 ATCC® 43895 | 10 - 300 | Growth |
Pseudomonas aeruginosa ATCC® 27853 | 10 - 300 | Markedly suppressed to inhibited |

The organisms listed are the minimum that should be used for quality control testing.

**Test Procedure**

Refer to appropriate references for specific procedures on the recovery of pathogenic *E. coli*.

**Results**

Refer to appropriate references for test results on the detection and enumeration of pathogenic *E. coli*.

**Storage**

Store sealed bottle containing the dehydrated medium at 2 - 30°C. Once opened and recapped, place container in a low humidity environment at the same storage temperature. Protect from moisture and light by keeping container tightly closed.

**Expiration**

Refer to expiration date stamped on the container. The dehydrated medium should be discarded if not free flowing, or if appearance has changed from the original color. Expiry applies to medium in its intact container when stored as directed.

**Limitations of the Procedure**

Due to varying nutritional requirements, some strains may be encountered that grow poorly or fail to grow on this medium.

**Packaging**

Tryptic Soy Broth, Modified with 20 mg / L Novobiocin & Acid Digest of Casein
