

*Selected One of Forbes'  
Top 200 Small Companies*

Dear Customer,

Based on the exemptions to the requirements outlined in 29 CFR 1910.1200(g) *Hazard Communication (Safety Data Sheets)* listed below, an SDS (Safety Data Sheet) is not required for the list of products attached to this letter.

Hazard Communication [1910.1200(b)(6)]

(6) *This section does not apply to:* [1910.1200(b)(6)]

(v) *Articles* (as that term is defined in paragraph (c) of the section);

(c) Definitions

**Article** means a manufactured item other than a fluid or particle:

- (i) *Which is formed to a specific shape or design during manufacture;*
- (ii) *Which has end use function(s) dependent in whole or in part upon its shape or design during end use; and*
- (iii) *Which under normal conditions of use does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this sections), and does not pose a physical hazard or health risk to employees.*

(d) Hazard classifications

(5) *The chemical manufacturer, imported or employer shall determine the hazards of mixtures of chemicals as follows:*

(iv) *If the chemical manufacturer, imported or employer has evidence to indicate that a component present in the mixture concentration of less than one percent (or in the case of carcinogens, less than 0.1 percent) could be release in concentration which would exceed an established OSHA permissible exposure limit or ACGIH Threshold Limit Value, or could present a health risk to employees in those concentrations, the mixture shall be assumed to present the same hazard.*  
[1910.1200(d)(5)(iv)]
