

# BREAK THE CHAIN OF INFECTION WITH

# BAC-TRACK

Next Level11's Bac-Track is the first software that allows you to monitor bacteria levels by department and equipment category through an easy to understand dashboard. With Bac-Track you can create the most effective counter contamination strategy through trend reports that help you understand, and break the chain of infection.

## IMPROVE PATIENT OUTCOMES AND LOWER OPERATING COST IN 3 STEPS:

TEST

1

Collect ATPs with ease using Neogen's patented sampler that has a flat sponge tip.

TREAT

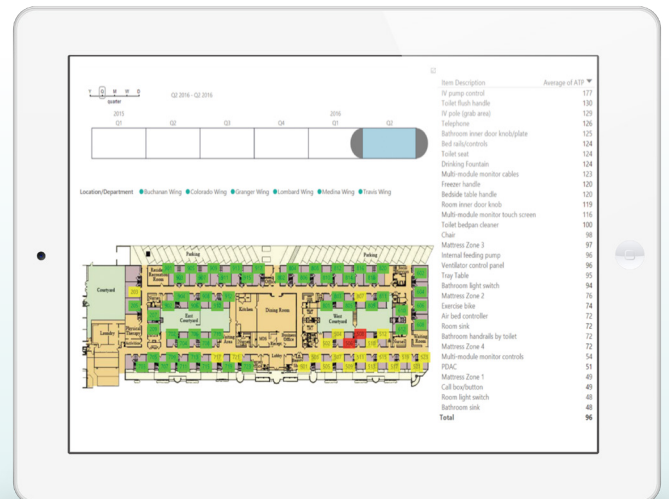

2

The AccuPoint Advanced reader has unique RFID technology that allows the test plan to be uploaded into the Bac-Track system automatically.

TRACK

3

Through Bac-Track's cloud-based Dashboard, you are able to view equipment by category, department, housekeeper, and more with a floor plan view to easily determine which areas are at the highest risk, all reported in real-time.

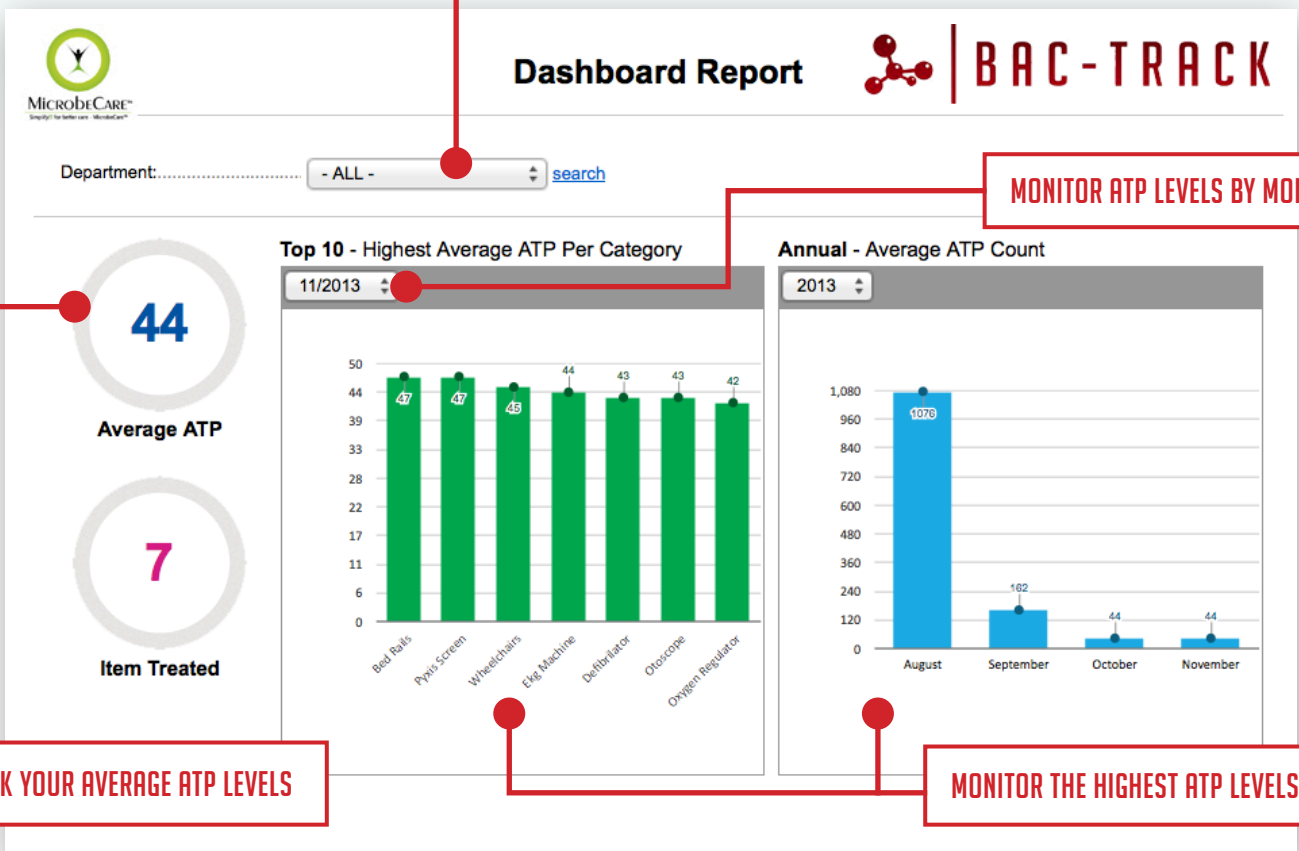

## UNIQUE FEATURES INCLUDE:

- Flat tip sampler
- Bac-Track squares for accurate data collection
- RFID meter technology
- Dashboard monitoring with floor plan view
- Ability to connect multiple facilities and view in our Map View

TRACK BACTERIA LEVELS BY DEPARTMENT
