Starter Kits

Starter Kits

9270 **Agri-Screen Starter Kit** – Contains Agri-Grind, wash bottle, well holder, marking pen, timer, 100 µL pipettor, 1000 pipette tips, tip rack and demonstration video

9274 **Agri-Screen Starter Kit without Pipettor** – Contains Agri-Grind, wash bottle, well holder, marking pen, timer and demonstration video

9285 **Reveal Mycotoxin Starter Kit** – Contains Agri-Grind, timer, rack for Reveal sample cups, 100 µL pipettor and tip rack

9286 **Reveal Q+ Starter Kit** – Contains Agri-Grind, timer, cup rack, 100 µL pipettor, 20–200 µL tip rack, 500 µL pipettor and 200–1000 µL tip rack

9271A **Veratox Mycotoxin Starter Kit** – Contains 12-channel pipettor, 100 µL pipettor, wash bottle, well holder, 1000 pipette tips, tip rack, marking pen, timer, reagent boats, demonstration video, lab station and software.

9528 **Alert for Histamine Starter Kit** – Contains 100 µL pipettor, pipette tips, tip rack, test tube rack (13 mm), timer, well holder, digital scale and demonstration CD.

9529 **Veratox for Histamine Starter Kit** – Contains 12-channel pipettor, 100 µL pipettor, 1000 pipette tips, tip rack, timer, 250 mL graduated cylinder, wash bottle, two 1 L bottles, 15 mL graduated tubes (500), demonstration CD-ROM, lab station, well holder, test tube rack (13 mm), and reagent boats

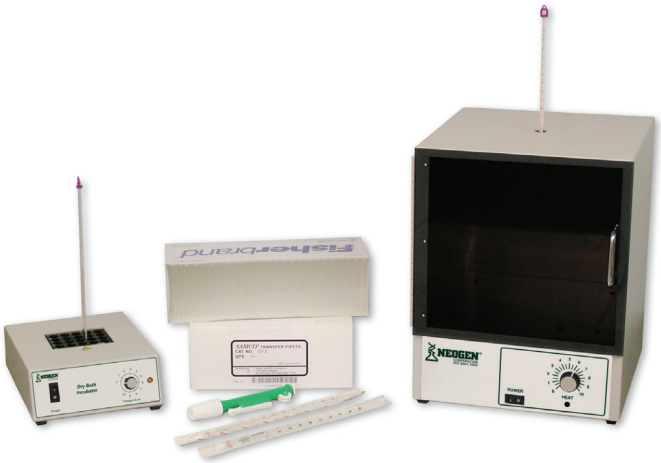
9281 **Alert Allergen Starter Kit** – Contains wash bottle, well holders, timer, two Nalgene 1 L bottles, 250 mL graduated cylinder and demonstration video

9280 **Veratox Allergen Starter Kit** – Contains 12-channel pipettor, adjustable pipettor (40–200 µL), wash bottle, well holder, 1000 pipette tips, tip rack, marking pen, three reagent boats, timer, test tube holder, 250 glass test tubes, two Nalgene 1 L bottles, 250 mL graduated cylinder, 14 funnels, 100 Whatman no. 4 filters, parafilm, lab station and demonstration video

9260 **Reveal 8 Hour *E. coli* O157:H7 Starter Kit** – Contains incubator, two large incubator baskets, 200 Stomacher-type bags, 200 test tubes with caps, test tube rack, pipette pump (10 mL), 500 x 10 mL serological pipettes and a timer

9265 **Reveal 20 Hour *E. coli* O157:H7 Starter Kit** – Contains incubator, two large incubator baskets, 200 Stomacher-type bags and a timer

9563 **Marine Biotoxins Starter Kit** – Contains microwell holder, bag clip and roller



***Listeria*/8 Hour *E. coli* O157:H7 Starter Kit (9275)**

Veratox for Mycotoxins Starter Kit (9271A)

9275 **Reveal for *Listeria* Starter Kit** – Contains incubator, heating block, dry block base, 1000 culture tubes, pipette pump (10 mL), 500 x 10 mL serological pipettes, test tube holder, two large incubator baskets and a timer

9720 **Reveal for *Salmonella* Starter Kit** – Contains two incubators, four large incubator baskets and a timer

6808 **ISO-GRID Starter Kit** – Contains 200 membrane filters, four filter units, two filter unit clamps, Methods Manual

6740 **Gene-Trak Starter Kit** – 120 V - Gene-Trak photometer standard set, three test racks, six dipstick holders, four wash basins and dilution chart

6741 **European Gene-Trak Starter Kit** – 220 V - Gene-Trak photometer standard set, three test racks, six dipstick holders, four wash basins and dilution chart

9268A **GeneQuence Starter Kit Without Water Bath** – Contains digital heat block, vacuum pump and tubing assembly, 8 channel pipette (20–200 µL), 20–200 µL pipette, 200–1000 µL pipette, disposable pipette tips (1–200 µL), disposable pipette tips (200–1000 µL), eight head strip washer, two carboys with spigot, 10 mL pipette pump, 10 mL sterile pipettes, modular heating block titer plate, heated block cover, angled thermometer, 1000 mL graduated cylinder, 12 x 75 mm glass disposable culture tubes, 13 mm test tube holder, Stomacher bags, 50 mL polypropylene tubes, and 500 mL plastic wash bottle

9268 **GeneQuence Starter Kit For New Start Up Labs** – Contains all components listed for item 9268A plus a water bath

9266 **GeneQuence Consumables Starter Kit** – Contains 50 mL polypropylene tubes, 12 x 75 mm glass disposable culture tubes, Stomacher bags, disposable pipette tips (1–200 µL), and disposable pipette tips (200–1000 µL)

9267 **GeneQuence Small Wash Starter Kit** – Contains eight head strip washer, two carboys, vacuum pump, side arm flask assembly and vacuum tubing assembly

9825 **Neogen ANSR Basic System –** Contains reader with computer, lysis system and 8-channel pipette (10–100 µL). For use with Neogen ANSR for *Salmonella*.

9837 **Neogen ANSR 2-Block Basic System –** Contains reader with computer, 2-block lysis system and 8-channel pipette (10–100 µL). For use with ANSR for *Listeria*.
